The activities of Jesus before the start of his ministry have been the subject of much speculation. Did he travel beyond the bounds of Palestine in his search for wisdom and knowledge? Where did he acquire the great learning which amazed those who heard him preaching and enabled him to cross swords in debate with scribes and pharisees? In this book, the author explores the deep layers of knowledge shared between the Judaic-Hellenic world and the northern Druids, from the secret geometry of masons and builders, which Jesus would have encountered in his work as a craftsman in Palestine to the Gematria or number coding of the Old and New Testaments.
